PROFESSIONAL SUMMARY

Fullstack Web Developer with hands-on experience building production web apps for e-commerce, fintech, civic-tech, and Web3. Comfortable across React, Next.js, TypeScript, and Supabase, and building on-chain with Solidity on Arbitrum L2. Work in Agile teams, owning the full cycle from system design to deployment, with testing via Playwright, unit, and black-box testing. Shipped both client projects and in-house SaaS products.

WORK EXPERIENCE

Fullstack Developer — PT. Bikin Semua Mudah

Mar 2026 – Present

Bogor, Indonesia

- Architected and shipped Luckoo, a campus e-commerce platform (Next.js, Supabase) with 4,300+ users, featuring multi-tier product filtering, Midtrans payment gateway, real-time chat with product bubble rendering, and dual shipping API integration (RajaOngkir & Komerce).
- Engineered Ringkas 1.0, a business management SaaS adopted by 7 companies for inventory, distribution, and financial operations, one client processes 135+ orders/month at Rp114M+ revenue.
- Developed Ringkas 2.0, a central operations hub used by 2 companies, automating marketplace fund reconciliation, financial audits, employee attendance, and payroll across 15+ integrated modules.
- Led development of Web BMT Mandiri Artha Sejahtera as Project Manager, digitizing a fully manual Islamic cooperative, covering member registration, Baitul Maal (social fund) programs, and financial transaction reporting, coordinating a development team from requirements to deployment.
- Owned end-to-end delivery across all products in an Agile workflow, from system architecture to production, with unit, black-box, and Playwright end-to-end testing.

Freelance Web Developer — Self-Employed

Jan 2025 – Mar 2026

Remote, Indonesia

- Developed Web Bimbingan Karya Ilmiah, a mentoring platform for academic competition coaching, integrated with Google Calendar, Drive, and Meet for scheduling, document sharing, and progress monitoring.
- Developed BlueWork, a full-stack recruitment platform with job listings, applicant tracking, an admin dashboard, and automated PDF/Excel export — streamlining the hiring workflow end-to-end.
- Delivered responsive company profile sites for BIBU AMDK (HTML/CSS/JS) and RA An-Najm (React + Tailwind CSS), tuned for performance and cross-device use.

Landing Page Builder Intern — Kafamilk / Pubmedia / Serena Hills

Jan 2025 – Apr 2025

Indonesia

- Designed and built responsive landing pages for 3 clients using Berdu and WordPress (Elementor), focused on clear user flow, visual appeal, and cross-device layout.

Website Administrator — Yayasan Al-Hadiid Cileungsi

Nov 2023 – Jan 2025

Bogor, Indonesia

- Maintained and updated school website content, improved site performance, and published institutional information based on school needs.

PROJECTS

Luckoo — E-Commerce Platform

2026

- Multi-vendor campus marketplace with 4,300+ users, Midtrans payment gateway, real-time chat with product bubbles, hierarchical filtering, Split Bill, and dual-API shipping. Stack: Next.js, TypeScript, Supabase, React Query, Zustand, Tailwind CSS.

Nusa — AI Financial Assistant (WhatsApp + Web)

2026

- AI financial assistant via a WhatsApp bot and web dashboard that parses income/expense messages with NLP (Groq, Llama 3), plus envelope budgeting, debt and receivable tracking, and cash-flow charts. Stack: React, TypeScript, Vite, Tailwind CSS, Supabase, Node.js/Express, whatsapp-web.js.

CropSage — Prescriptive-Analytics Crop Recommendation DSS

2026

- Decision support system recommending crops from soil and climate data using a calibrated Random Forest (99% accuracy) with SHAP explainability and out-of-distribution detection, backed by a star-schema data warehouse. Stack: FastAPI, scikit-learn, SHAP, React, TypeScript, Recharts.

Sims — Blockchain-Integrated Information System

2026

- Web-based information management system with an on-chain Solidity smart contract module and Playwright end-to-end testing. Stack: React, Solidity, Supabase, Playwright.

- Saku** — Non-Custodial Web3 Payment Wallet

2026

 - Phone-number-based crypto payment protocol on Arbitrum Sepolia with USDC transfer, QRIS-style QR payment, Amplop (digital envelopes), and USDC staking. SakuRegistry contract uses Keccak256 phone hashing with AES-GCM encrypted private keys. Stack: Next.js, Solidity, Arbitrum Sepolia, Supabase.
- Accounting System** — Blockchain-Anchored Financial Platform

2025

 - AI-integrated accounting system on Base Sepolia anchoring transaction hashes on-chain for financial integrity, with Gemini AI audit and automated PDF reporting. Stack: Next.js, Solidity, Base Sepolia, Supabase.
- Demokratos** — AI-Moderated Public Participation Platform

2025

 - Civic-tech platform combining AI moderation and digital policy tools for transparent citizen-government interaction, public complaints, policy voting, and discussion. Stack: React, Firebase, Gemini AI, Tailwind CSS.
- Tech Edify** — Informatics LMS

2025

 - Web-based Learning Management System (LMS) for learning informatics, featuring learning materials, interactive quizzes, daily progress tracking, learning streaks, and admin management. Stack: React, Supabase, Tailwind CSS.

ORGANIZATIONAL EXPERIENCE

- Staff of Web Development** — GDGoC UIN Jakarta

Nov 2025 – Present

 - Conducted weekly Web Development training on Web 2.0 & Web 3.0 concepts, prepared learning modules, reviewed coding tasks, and mentored participants.
 - Served as speaker at GDGoC Weekly Class Web Dev 2.0, facilitating sessions on Advanced CSS, CSS Frameworks, and Tailwind CSS.
- Google Student Ambassador** — Google Indonesia

Sep 2025 – Jan 2026

 - Promoted Google educational tools (Gemini, NotebookLM) to students and educators
 - Acted as liaison between Google Indonesia and the student community to encourage innovation and digital literacy on campus.

EDUCATION

- Bachelor of Information Systems** — UIN Syarif Hidayatullah Jakarta

2024 – 2028 (Expected)

Tangerang, Indonesia

TECHNICAL SKILLS

- Frontend:** HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, Three.js, React Query, Zustand
- Backend & Database:** Supabase, Firebase, PostgreSQL, MySQL, Redis, Laravel, PHP, Python, Spring Boot, Node.js, RESTful API Design
- Web3 & Blockchain:** Solidity, Arbitrum L2, Base Sepolia, Smart Contract Development, SUI, Solana, Stellar, Rust
- Tools & Design:** Git, GitHub, Figma, Canva, Inkscape, Google Cloud Platform, WordPress, Elementor, Microsoft Clarity, CI/CD
- APIs & Integrations:** Midtrans, RajaOngkir, Komerce, Google Cloud Platform, Duitku, Xendit
- Soft Skills:** Technical Communication, Cross-functional Collaboration, Time Management, Mentorship
