PROFESSIONAL SUMMARY

Fullstack Web Developer with hands-on experience delivering production-grade web applications across e-commerce, fintech, civic-tech, and Web3 domains. Proficient in React, Next.js, TypeScript, and Supabase, with a growing track record in blockchain development using Solidity on Arbitrum L2. Experienced in leading full-cycle development — from system design to deployment — across client projects and in-house SaaS products.

WORK EXPERIENCE

Fullstack Developer — PT. Bikin Semua Mudah

Mar 2026 – Present

Bogor, Indonesia

- Developed and maintained Luckoo, a campus e-commerce platform (Next.js, Supabase) with multi-tier product filtering, Midtrans payment gateway, real-time chat with product bubble rendering, and dual shipping API integration (RajaOngkir & Kommerce).
- Built Ringkas 1.0, a business management SaaS for inventory, distribution, and financial operations with real-time sync across retail workflows.
- Developed Ringkas 2.0, a centralized operations hub that automates marketplace data ingestion, financial reporting, employee salary management, and session tracking.
- Built Web BMT Mandiri Artha Sejahtera, a financial management system for an Islamic cooperative covering member data, transaction management, and reporting.
- Delivered full-cycle development for all products from system architecture to production deployment.

Freelance Web Developer — Self-Employed

Jan 2025 – Mar 2026

Remote, Indonesia

- Developed Web Bimbingan Karya Ilmiah, a mentoring platform for academic competition coaching — integrated with Google Calendar, Drive, and Meet for real-time scheduling, document sharing, and parent/student progress monitoring.
- Built a full-stack recruitment application (BlueWork.ID) with job listings, applicant forms, admin dashboard, and PDF/Excel data export — using React, Supabase, and Tailwind CSS.
- Developed responsive company profile websites for BIBU AMDK (HTML/CSS/JS) and RA An-Najm (React + Tailwind CSS), optimized for performance and cross-device compatibility.

Landing Page Builder Intern — Kafamilk / Pubmedia / Serena Hills

Jan 2025 – Apr 2025

Indonesia

- Designed and built responsive landing pages for three clients using Berdu and WordPress (Elementor), focusing on clear user flow, visual appeal, and cross-device optimization.

Website Administrator — Yayasan Al-Hadiid Cileungsi

Nov 2023 – Jan 2025

Bogor, Indonesia

- Maintained and updated school website content, optimized site performance, and published timely institutional information based on school needs.

PROJECTS

Luckoo — Campus E-Commerce Platform

2026

- Multi-vendor campus marketplace with Midtrans payment gateway, real-time chat with product bubbles, hierarchical product filtering (University → Fakultas → Prodi), Split Bill, and dual-API shipping. Stack: Next.js, TypeScript, Supabase, React Query, Zustand, Tailwind CSS.

Saku — Non-Custodial Web3 Payment Wallet

2026

- Phone-number-based crypto payment protocol on Arbitrum Sepolia with USDC transfer, QRIS-style QR payment, Amplop (digital envelopes), and USDC staking. SakuRegistry contract uses Keccak256 phone hashing with AES-GCM encrypted private keys. Stack: Next.js, Solidity, Arbitrum Sepolia, Supabase.

Harsa — Decentralized Agri-Finance Protocol

2026

- Gasless Arbitrum-based DeFi protocol for agricultural trade with on-chain escrow, QR asset traceability, and intermediary-free settlements. Stack: Next.js, Solidity, Arbitrum, Supabase.

Accounting System — Blockchain-Anchored Financial Platform

2025

- AI-integrated accounting system on Base Sepolia anchoring transaction hashes on-chain for financial integrity, with Gemini AI audit and automated PDF reporting. Stack: Next.js, Solidity, Base Sepolia, Supabase.

Demokratos — AI-Moderated Public Participation Platform

2025

- Civic-tech platform combining AI moderation and digital policy tools for transparent citizen-government interaction — public complaints, policy voting, and discussion. Stack: React, Firebase, Gemini AI, Tailwind CSS.

Tech Edify — Informatics Learning Portal 2025

- Web-based learning platform with daily progress tracking, learning streaks, interactive quizzes, and admin management. Stack: React, Supabase, Tailwind CSS.

Finedu — Personal Finance Education Platform 2025

- Financial literacy platform for students with interactive lessons, budget planner, financial calculators, and debt/savings tools. Stack: React, Figma, Tailwind CSS.

ORGANIZATIONAL EXPERIENCE

Staff of Web Development — GDGoC UIN JakartaNov 2025 – Present

- Conducted weekly Web Development training on Web 2.0 & Web 3.0 concepts, prepared learning modules, reviewed coding tasks, and mentored participants.
- Served as speaker at GDGoC Weekly Class Web Dev 2.0, facilitating sessions on Advanced CSS, CSS Frameworks, and Tailwind CSS.

Google Student Ambassador — Google Indonesia Sep 2025 – Jan 2026

- Promoted Google educational tools (Gemini, NotebookLM) to students and educators
- Acted as liaison between Google Indonesia and the student community to encourage innovation and digital literacy on campus.

EDUCATION

Bachelor of Information Systems — UIN Syarif Hidayatullah Jakarta Aug 2024 – Aug 2028 (Expected)
Tangerang, Indonesia

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, Three.js
Backend & Database: Supabase, Firebase, PostgreSQL, MySQL, Laravel, PHP, Python, Spring Boot
Web3 & Blockchain: Solidity, Arbitrum L2, Base Sepolia, Smart Contract Development, SUI, Solana
Tools & Design: Git, GitHub, Figma, Canva, Inkscape, Google Cloud Platform, WordPress, Elementor
APIs & Integrations: Midtrans, RajaOngkir, Komerce, Google Cloud Platform, Duitku
Soft Skills: Technical Communication, Cross-functional Collaboration, Time Management, Mentorship
